# INTELLIFLO3® VSF POOL PUMP

## Get an award-winning pump from an industry leader

Every good story begins with a hero. One of the unsung heroes of the pool industry is variable speed and flow technology, which Pentair introduced to the United States roughly two decades ago.

What makes variable speed and flow so notable is its incredible energy efficiency. In fact, with a third-generation IntelliFlo3® Variable Speed and Flow Pump, pool owners can save up to 90%\* on energy consumption.

### Key features

#### ◀ Flow Control

Patented flow technology automatically adjusts to the pool's condition. As debris clogs the filter, the pump will speed up to maintain the proper flow.

#### ◀ Automation

Built-in entry-level automation to connect your pump to two additional pieces of pool equipment, such as pool lighting, to give easy control from anywhere, anytime using the Pentair Pool app.

#### ◀ Connectivity

Get real-time status information, alerts, and notifications in the Pentair Pool App or on the pump touchscreen. Connect the pump to Wi-Fi to keep software current with over-the-air (OTA) updates.

#### ◀ Replacement

A versatile pump replacement suitable for various pools with 1.5HP or 3.0HP.

#### ◀ Quiet Design

Unparalleled performance without the noise. This VSF pool pump supports low sound supporting flow.

### Avoid a trip to the pool pad

Download the Pentair Pool app to access your pool anytime, anywhere. Customize for your needs by setting up programs and schedules to manage your pool conveniently.

# The pump is the heart of the pool, and flow control technology helps maintain the right rhythm.

## Adjusts to pool conditions

As conditions change with your pool water, flow speed adjusts automatically.

## Optional touchscreen

For more control and flexibility.

## For big pool benefits

Clearer water, bubbling bubblers, cascading fountains, and critical equipment that is taxed less and lasts longer.

## Energy savings

The combination of variable speed and sensorless flow saves you up to 90%\* on energy consumption.

## Manage pool lighting

right from the pump with relay board for entry-level automation.

\*Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 20,000-gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.
